STABLE

FAST

CONVENIENT

RELIABLE

i 1000 Automatic Chemiluminescence Immunoassay System uses the magnetic microparticles based, Acridinium Ester (AE) direct chemiluminescence technology. The character of stable performance, fast report, convenient operation and reliable results could make it fully applicable to various application environments of medical laboratories.

The design orientation of i 1000 could not only meet the routine test requirements of medium and small hospitals, but also provide supports to the assay development and STAT tests of large hospitals. The mature compatible system of instrument and reagent, and strict system of metrological traceability could ensure the test results accurate and reliable.

i 1000

AUTOMATIC CHEMILUMINESCENCE ANALYZER

Stable

Multiple magnetic separation technology, high-efficient B/F separation.
Patented magnetic field design, minimize the magnetic beads' loss.
The track-based technology ensures the accurate sampling of micro-volume.
The needle has the detection function to the liquid level, clot and aspiration failure. The carry-over is less than 0.1ppm.

Fast

Single-module runs up to 180T/H
Time to the first result: 14 minutes

Convenient

Automatic startup and shutdown
Continuous reagents replacement and samples loading during the operation
STAT Prioritization, Automatic Rerun
Chinese software, easy to learn

Reliable

Full loaded unattended operation for 4 hours
Remote Diagnosis
Thorough system of metrological traceability

i1000
AUTOMATIC CHEMILUMINESCENCE ANALYZER

Cuvettes loading by dumping, one-time for 1200 cuvettes.

Used cuvettes recycling to separate the solid and liquid, which will efficiently reduce the biological safety risks.

30 refrigerated reagent positions, RFID management for reagent info, online reagent replacement.

i1000

AUTOMATIC CHEMILUMINESCENCE ANALYZER

STAT samples could be placed randomly and be tested preferentially.

RFID management for activators
Special design to prevent the activators to be placed incorrectly.

Humanized interface design, convenient operation and easy to learn.

SPECIFICATIONS

Performance

Technology: Automatic /single tube
Principle: Acridinium Ester (AE) Direct
Chemiluminescence immunoassay
technology
Throughput: 180 Tests/h for one module
Time to the first result: 14min

Sample Module

Sample loading capacity: 50, loading with
sample racks.
Automatic retest, STAT samples could be
placed randomly and tested
preferentially

Sample Loading System Module

Sample carry-over <0.1ppm
Foam/Clot and Liquid level detection /
Volume tracking /Collision-avoidance
Sample type: Serum /Plasma /Whole
blood /Urine

Reagent Module

30 reagent positions
Information management through Radio
Frequency Identification Card (RFID)
Real-time, onboard mixture of magnetic
beads
Reagent online replacement

Consumable Module

Loading capacity of cuvettes: 1200
Cuvettes loading by dumping

Detection Module

Reaction temperature: 37°C
Mode: Compatible with the common
immunoreaction
Mixing: Non-contact Stir
Magnetic separation: Multiple magnetic
separation technology

Function

Operation system: Windows 7 and above
Display: LCD touch screen
Remote diagnosis system
Automatic startup & shutdown
Bi-directional communication

Environmental Requirements

Temperature: 10°C-30°C
Humidity: 30%-70%
Altitude: -200m-3700m

i 1000

AUTOMATIC CHEMILUMINESCENCE ANALYZER

SARS-CoV-2 IgM (CLIA) SARS-CoV-2 IgG (CLIA)

Compatible with i 3000 and i 1000 automatic chemiluminescence analyzer

SARS-CoV-2 IgM, IgG separate detection
Apply to serum and plasma
Pretreatment is not required.
Response time is 20 minutes
Open vial expiry date is up to 35 days

SARS-CoV-2 IgM (CLIA) SARS-CoV-2 IgG (CLIA)

Clinical evaluation

IgM	Clinical diagnosis results		Total
	+	-	
+	301	0	301
-	45	321	366
Total	346	321	667

Positive coincidence rate (sensitivity): 86.99%
 Negative coincidence rate (specificity): 100.00%
 Total coincidence rate: 93.25%
 kappa=0.866

IgG	Clinical diagnosis results		Total
	+	-	
+	333	6	339
-	13	315	328
Total	346	321	667

Positive coincidence rate (sensitivity)96.24%
 Negative coincidence rate (specificity): 98.13%
 Total coincidence rate: 97.15%
 kappa=0.943

* Kappa>0.75, which means the test result is highly coincident with the clinical diagnosis results.

Application Environment

Apply to fever clinic and STAT

Suitable for large-scale sample processing

i 1000 Automatic
Chemiluminescence Analyzer
180T/H

i 3000 single module
Automatic Chemiluminescence
Immunoassay System
300T/H

i 3000 Dual-module
Automatic Chemiluminescence
Immunoassay System
600T/H

Product features

Safe

Fully closed automatic detection and unattended operation for 4 hours
 Used samples recycling to separate the solid and liquid to ensure the biosafe

Convenient

The reaction time is 20 minutes
 Pretreatment is not required
 Apply to serum and plasma

Accurate

Direct chemiluminescence technology based on AE has been adopted
 Patented washing technology to avoid the carry-over
 SARS-CoV-2 IgM, IgG separate detection is suitable for Interpretation of results in different modes
 Increase optimized recombinant S protein fragments for better prognosis and rehabilitation assessment

Kit information

Products name	Specifications	Catalog No.
SARS-CoV-2 IgM (CLIA)	2×200 Tests/Box	EIM4408013
SARS-CoV-2 IgG (CLIA)	2×200 Tests/Box	EIM4408014
